

greedy trajectory, verified to pass its tests

```
functionf ( n ) {returnn * 2 ; }
```

substitute the model's own  
second choice  $\tilde{y}_t$

```
functionf ( n ) {returnn + 2 ; }
```

$K^{\text{syn}}$  does not parse

$K^{\text{type}}$  fails the type checker

$K^{\text{sem}}$  runs, fails its tests

pass runs, still passes

suffix held fixed — one execution, no generation, deterministic
